Passerelles

Passerelles—Hydraulic Telescoping Boarding Equipment

Steelhead Marine passerelles are custom designed and manufactured to meet our clients' exacting standards and requirements. We feature a custom-designed collapsible space-saving handrail system that we build completely in-house.

Passerelles are available in Single, Double, and Triple stage configurations.

Functions:

- Extension
- Retraction
- Self-centering
- Slewing
- Luffing
- Float

Materials:

- Welded aluminum 6061 T6
- Teak decking and lighting options available
- Stainless handrails extend/retract with movement of passerelle

Paint:

- Custom Polyurethane and anodized finish

Power Requirements:

- 12 or 24 VDC

Hydraulics:

- Custom made cylinders
- Dedicated hydraulic power unit or can be run off ship's hydraulics
